P21~23 ▶ Resuscitator Accessories

P24 ▶ Airway Management

P25~32 ▶ Breathing / Anesthesia Systems / Breathing bag

P33~P34 ▶ Catheter Mount / Speaking Valve

P35~40 ▶ Circuit Accessories

P41~42 ▶ HME & Filters / Tracheostomy HME

P43 ▶ HMEF & Filter For Pediatric

P44 ▶ Breathing / Anesthesia Tubing

P45~50 ▶ Non-invasive Mask for hospital

P51 ▶ Mask accessories / Headgear

P52 ▶ Twin Port Mask / Headgear

Touching lives, Improving life.

The symbol "H" reflects our loyalty and honesty to all customers. We help, cooperate, grow with each other and share the achievement with a grateful hand-shaking.

As a medical products supplier, making good quality products is our aim and just like a shield to protect patients.

History

- 1993 Company founded.
- 1994 Begun operating and skilled in liquid silicone rubber injection molding, producing baby nipple, silicone mask and silicone components.
- 1995 Started blow molding operation and producing air cushion mask.
- 1996 Started producing oxygen therapy products, such as oxygen mask, aerosol mask etc.
- 1999 Certified by ISO 9001 and ISO 13485.
- 2002 FDA Listing for medical products.
- 2003 Started producing Resuscitators and CPR Face Shield.
- 2004 Started producing Laryngeal Airway Mask.
- 2005 Started producing CPAP Masks.
- 2006 Moved to HQ certified GMP and ISO 13485.
- 2007 Started producing Anesthesia & Breathing Circuits.
- 2008 Kept extending range of CPAP Masks & Breathing Circuits.
- 2010 Extended facility and set up Tubing Forming production equipment.
- 2011 Increased silicone & plastic injection capacity as well as testing & inspection equipments.
- 2014 Certified CMDCAS 13485.
- 2015 Added a new wing to main building(extension).
- 2016 Added 2 Full climate control rooms.
- 2017 Introduction of automatic production.
- 2019 MDSAP Certified.
- 2020 New Factory expansion started.
- 2021 Preparation for MDR TD.
- 2024 Houli New Facility Officially Operational.
- 2025 Houli New Facility cereified QMS and ISO 13485.

Being a professional respiratory care medical device manufacturer, we have been dedicated carefully in providing the best quality and most sufficient solution as an accountable partner to human being healthcare.

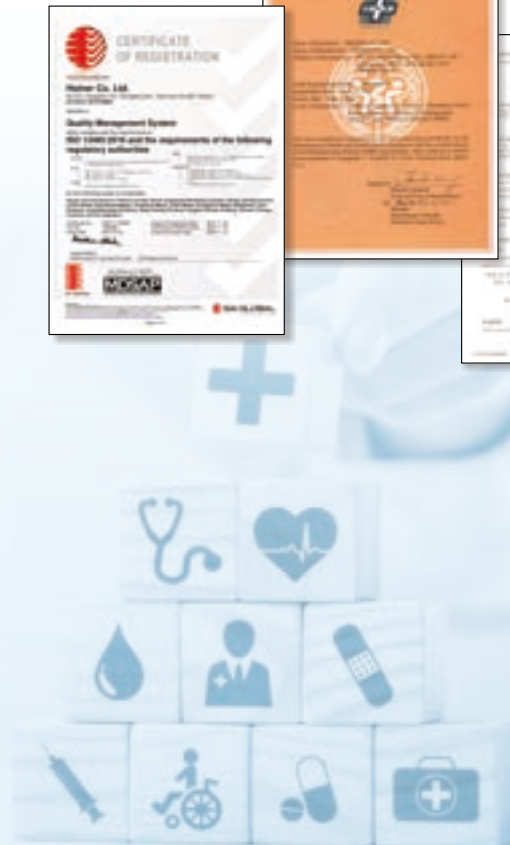

Quality Assurance

Hsiner has a quality system that is an integral part of every process. This combined effort results in the creation of high quality molded components for our customers. Our Quality System is based on the ISO 13485 and QMS Quality System Standard.

We have trained quality personnel within our facility working to assure an in control maintained. The final proof of the success of these efforts is the part itself. To insure quality, parts are visually inspected for conformance to design criteria. Additional testing is available based on customer's needs.

Future prospect

Today's society is changing at an extremely fast pace. We at HSINER have constantly strived in our professional field to offer the best quality products to satisfy our customers. Taking care of patients' respiration and health is our main goal. We insist on this level of professionalism in order to satisfy our customers with the safest, most comfortable products.

Disposable Manual Resuscitator

The Manual Resuscitator is designed to provide effective breathing assistance. It's simple and safe construction makes it desirable for use in acute situations.

The construction helps ensure easy and fault-free assembly.

All connections meet ISO standards. Resuscitators are available in three different size - adult, child and infant - covering a wide range of tidal volumes.

*Optional: Non-magnetic pop-off / PEEP valve / pressure gauge for MRI use.

Silicone breathing system with water traps

70340: Silicone breathing system for adult, 1.5 meter length with two water traps.

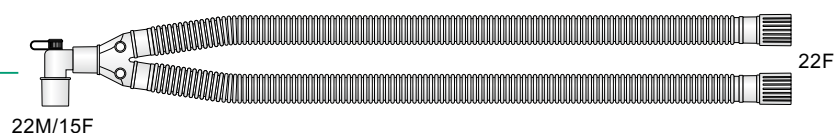

*Carton pack: 20pcs

Silicone breathing system

70320: Silicone breathing system for adult, 1.5 meter length.

*Carton pack: 20pcs

Hsiner offers quality breathing systems, which are open and closed circuits. They are compatible with entire line of face masks, breathing bags, accessories and filters.

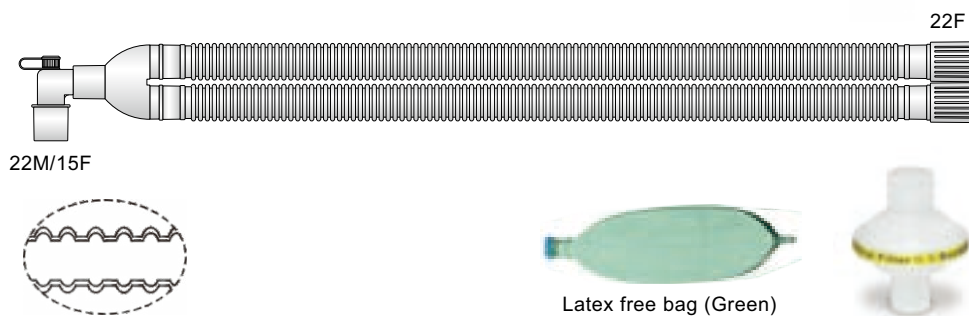

The two basic circuits are the open circuit in which the patient has access to environmental air as well as the anesthetic-oxygen mixture and exhales into the environment, and the closed system in which all gases are rebreathed, normally the closed one based on the use of unidirectional valves to ensure that the gases always pass in the correct direction.

Breathing system with parallel connector, mask, reservoir bag and filter.

Mask: size 5 for adult, size 3 for child.

Circuit: 2 meter length, corrugate tube, collapsible tube and PVC smoothbore tube available.

Reservoir bag: 2.0 liter for adult, 1.0 liter for child.
